

CoastSat shoreline trend 1999-2026
(33,422 transects, 604 sites)

Same transect, different periods
 $\rho=0.41$, sign agreement 64%, $n=22,509$

Same transect, same period
 $\rho=0.52$, sign agreement 68%, $n=12,312$

Driver correlations depend on record length,
not method (same transects, site-block bootstrap)
